

NEOFLEX PLASTERING FINISHING TROWEL

PREMIUM HI-FLEX AUSTENITIC STAINLESS STEEL FOR
FLAWLESS FINISHES

Engineered for superior finishing performance, the ROUGHNECK NeoFlex Plastering Finishing Trowel combines advanced materials with precision-focused design to deliver consistently immaculate results. Crafted from premium hi flex austenitic stainless steel, the finishing blade provides a highly responsive feel and an exceptionally smooth, low drag glide for achieving immaculate finishes. The blade's inherent flexibility is enhanced by the Balanced-Flex system, in which the hi flex blade is supported by an extended central spine, allowing the blade to flex across the width while remaining reinforced along the length. This extended spine ensures that pressure is distributed evenly along the entire blade length, minimising rippling, and providing a uniform, flawless finish. Radiused corners further reduce drag lines and help prevent unwanted marks during final passes. A durable soft-grip handle provides secure control and sustained comfort throughout prolonged periods of use. The handle is mounted on a lightweight, high-strength aluminium mount, fully riveted to a central spine that is bonded directly to the hi-flex blade. This construction delivers outstanding structural integrity and long-term durability. A precision-engineered finishing trowel designed for tradespeople who demand consistency, finesse and exceptional surface finishes.

- Premium austenitic stainless steel
- Balanced flex-system
- Radiused corners
- 0.4mm hi-flex blade
- Aluminium alloy mounting
- Soft grip
