

PLASTERBOARD RASP

DESIGNED FOR FAST, CONTROLLED SHAPING OF PLASTERBOARD EDGES

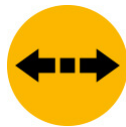

Designed for fast, controlled shaping of plasterboard edges, the ROUGHNECK Plasterboard Rasp delivers the efficiency, clean cutting and comfort needed for accurate board preparation. The stainless steel blade provides long-lasting durability and maintains a sharp, consistent cutting action. Its open design helps resist clogging and reduces dust build-up, allowing material to clear freely and keeping performance steady throughout the job. Bi-directional cutting teeth remove material on both the push and pull stroke, ensuring smooth, continuous cutting with every pass. A soft-grip handle offers comfort and control during extended use, supporting precise shaping and reducing fatigue on larger projects. A dependable, professional-grade rasp ideal for trimming, shaping and refining plasterboard edges with speed and accuracy.

- Stainless steel blade
- Bi-directional cutting
- Soft grip
